仁籤妙解

Produc Highlights:

- Utilizes prompt-based and retrieval-augmented generation technology to reduce manpower demand at temples.
- Incorporates augmented or mixed reality for enhanced interactivity and engagement.
- Integrates voice input, location recognition, and gesture control for easier and more accessible operation.
- Offers a customized guidance system to direct users to appropriate deities based on their fortune results.

Product Features

- Provides voice-based fortune explanation services with flexible suggestions based on different aspects of inquiries.
- Preserves traditional fortune-telling culture through digital transformation, enhancing interaction between younger generations and temples.
- Allows users to simultaneously view the fortune-telling process and conduct physical worship and divination, improving the experience.
- Offers guided tasks tailored to the fortune result, while retaining worship-related content.

Operation Flow & Demonstration
