

Integrated Library System

Abstract:

This project presents a **Multi-functional Library and Text Management System** developed using the Python Tkinter framework. The software evolved from a basic GUI prototype into a robust application integrating document editing, real-time web API queries, and **data management tools**.

Core Functionality Analysis

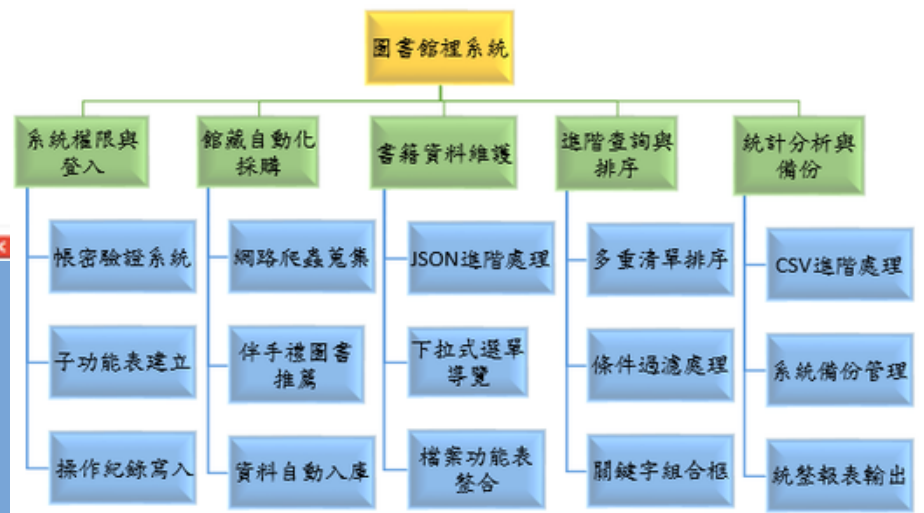

Check-out and Check-in

- ✔ Secure Access Control
- ✔ Advanced Text Editor
- ✔ Book Information Inquiry
- ✔ List and Data Management

Online Inquiry (Chinese Optimized)

System Overview
